9. Acknowledgments

Books of this nature take years of rigorous work and the unwavering support of numerous friends and colleagues to produce and complete. This is our small way of thanking those who have supported us throughout the years:

To our main Guyanese field companions and trainees: Deokie “Jackie” Arjoon, Paul Benjamin, Festus Marco, Indranee Roopsind, Hemchandranauth Sambhu, Solomon “Jack” Garcia, Giuliano “Kinky” Seegobin (whose friendship and kind hospitality was really appreciated), and Reuben Williams, we owe you our greatest debt and on many occasions our laughter, through the sometimes difficult situations.

To friends who helped with logistics in Guyana: KP our taxi driver in Georgetown, and the Nyron Rahaman family at Menzies Landing, with a special thanks to Farida Rahaman for her hospitality and wonderful cooking; collectively you guys can organize the world!

To all the enthusiast porkknockers of Menzies Landing that collected specimens for us; thank you for taking time off from your gruelling day’s work to run after a frog, lizard or snake.

To friends and colleagues who provided photographs that were used (or not) in some of the figures: Raffael Ernst (Technische Universität, Berlin), Philippe Gaucher (CNRS-Guyane, Cayenne), Marinus Hoogmoed (Museu Paraense Emílio Goeldi, Belém), Karl-Heinz Jungfer (Gaildorf), Christian Marty (Montjoly), and Andreas Schlüter (Staatliches Museum für Naturkunde, Stuttgart), we appreciate your efforts.

To friends and colleagues who provided call recordings that were used to generate oscillograms and spectrograms when no adequate recording was available from Kaieteur: Raffael Ernst, Philippe Gaucher, Karl-Heinz Jungfer, Christian Marty, and Andreas Schlüter, thank you for your support.

To Ross MacCulloch (Royal Ontario Museum, Ontario), Andreas Schlüter, and Celsa Señaris (Museo de Historia Natural La Salle, Caracas) for kindly supplying some literature, to Darrel Frost (American Museum of Natural History, New York) for permitting us to use a figure from one of his great papers, to Julien Cillis (Institut Royal des Sciences Naturelles de Belgique, Brussels) for technical assistance in Scanning Electron Microscopy, to César Barrio-Amorós (Fundación AndígenA, Mérida), Santiago Castroviejo-Fisher (Uppsala University, Uppsala), Raffael Ernst, Julian Faivovich (Museo Argentino de Ciencias Naturales, Buenos Aires), Taran Grant (Pontificia Universidade Católica do Rio Grande do Sul, Porto Alegre), Marinus Hoogmoed, Karl-Heinz Jungfer, Amy Lathrop (Royal Ontario Museum, Ontario), Ross MacCulloch, Les Minter (University of Limpopo, Limpopo), Brice Noonan (The University of Mississippi, Mississippi), Andreas Schlüter, Mark Wilkinson and David Gower (The Natural History Museum, London) for constructive and interesting discussions we owe an equally great debt.

For the loan or exchange of specimens under their care we thank Jon Campbell and Carl Franklin (University of Texas at Arlington, Arlington), Enrique La Marca

(Universidad de los Andes, Mérida), Ross MacCulloch and Robert Murphy (Royal Ontario Museum, Ontario), Anne-Marie Ohler and Laure Pierre (Muséum National d'Histoire Naturelle, Paris), Celsa Señaris and Gilson Rivas (Museo de Historia Natural La Salle, Caracas), Andreas Schlüter and Raffael Ernst, and Koos van Egmond (Nationaal Natuurhistorisch Museum, Leiden).

Tenki kulu (thank you in Patamona) to the Chenapou Community for welcoming us into their village, and to the following persons for sharing their knowledge and wisdom with us: Rupert Williams, Abel Albert, Edna Albert, David Anderson, Yvette Andrew, Les Benjamin, Silvie Benjamin, Saron Branch, Donald Daniels, Shirley Daniels, Susan Edward, Vincent Edwards, K. Edwin, Cassimiro Francisco, Jackson Fredricks, Henry Fredricks, Hildma Fredricks, Clement Jimmy, Lio John, Wendy John, Austin Kanichio, Linda Kanichio, Rufford Nagalla, Abel Marco, Jackie Marco, M.J. Marco, Samuel Marco, Shaquila Marco, Melvina Melville, Valerie Pablo, Septmus Simon, Jannis Skybar, Juliana Stephen, Linda Williams, and Stanley Williams.

Tenki kulu also to Melina Kalamandeen, Andrew Higgins, Ministry of Amerindian Affairs, George Simon at the Amerindian Research Unit, University of Guyana, Guyana Forestry Commission, Navin Roopnarine of the National Parks Commission, and Bhaleka Suelall of the Ministry of Agriculture Hydrometeorological Services – Guyana.

We also deeply acknowledge the Prime Minister of Guyana, The Honorable Samuel Hinds for his help and support, the Ambassador of Guyana in Brussels, His Excellency Patrick Gomes and his secretary Myrna Vincke and all the personnel of the Guyana Embassy in Brussels for their help in many ways, and Georges Lenglet (Institut Royal des Sciences Naturelles de Belgique, Brussels) for his support and collaboration in the Global Taxonomy Initiative research project.

Permission to conduct this study at Kaieteur National Park was granted by Shyam Nokta and Inge Nathoo of the Guyana National Parks Commission, with specimen verification conducted by the Department of Biology, University of Guyana, and research and collection permits issued by the Guyana Environmental Protection Agency. We cannot express how grateful we are for your help, oftentimes going beyond the call of duty to assist.

We are, of course, indebted to the Belgian Directorate-General of Development Cooperation for its generous financial support. The King Léopold III Fund for Nature Exploration and Conservation provided additional support.

The first author wishes to express gratitude to his partner Sylvie De Passe and his daughter Lili Kok for their patience during his long absences in the field without proper communication and during the (too) many hours spent at home in his study trying to complete this book.

Finally, we thank the editors of the *AbcTaxa* series for inviting us to produce this manual, Mark Wilkinson for helpful comments on the caecilian part of the text and Ron Heyer (Smithsonian Institution, Washington DC) for a critical review of a previous version of the manuscript.

10. About the authors

Philippe J. R. Kok (°1970) is involved in herpetological research in the Guiana Shield since 1996. His research interests include the systematics, biogeography and ecology of Neotropical herpetofauna. He currently concentrates his efforts on the phylogenetic relationships, systematics, biogeography and ecology of the Guiana Shield highlands herpetofauna. He has always been interested in collecting in poorly studied, remote and difficult to access areas, and in providing information on the distribution, abundance and habitat requirements of species for effective conservation planning and management. He is currently research associate at the Royal Belgian Institute of Natural Sciences and CITES expert (Reptiles and Amphibians) for the Belgian Government.

More information on his research may be found at <http://www.philippekok.com>

Michelle Kalamandeen (°1981), on the right on the photo, works as the Scientific Officer at the Centre for the Study of Biological Diversity at the Department of Biology, University of Guyana. She was a Commonwealth Scholar in 2004-2005 where she completed a Masters' in Biodiversity Conservation & Management at the University of Oxford. She has been involved in herpetological research that involves indigenous peoples mainly at Shell Beach in the Northwestern region of Guyana since 2000. Through her work at Shell Beach, she is currently the Protected Areas, Education & Research Coordinator of the Guyana Marine Turtle Conservation Society. Her interests include protected area designation and management, the role of indigenous peoples in conservation, and species distribution and ecology.

11. Appendix – Taxonomic index

Species treated and page numbers that hold taxa descriptions are in bold, page numbers that hold species illustrations are in italics.
