Deposition of type material of *Hemisarcoptes budensis* Fain & Ripka, 1998 (Acari: Hemisarcoptidae)

by A. Fain and G. Ripka

*Hemisarcoptes budensis* Fain & Ripka, 1998 (Acari: Hemisarcoptidae) has been described, from all developmental stages, from Hungary. The holotype deutonymph as well as paratypes of all the stages: females, males, nymphs (protonymphs, deutonymphs and tritonymphs) and larvae, were deposited in the Institut royal des Sciences naturelles de Belgique (*International Journal of Acarology*, 1998: 24 (1): 41-44).

We complete here the list of the Institutions where typical specimens of this species have been deposited:

1. Hungarian National History Museum, Budapest (Dr S. Mahunka): 12 females, 4 males, 7 nymphs (protonymphs and tritonymphs), 4 deutonymphs and 1 larva, all paratypes.

2. Museum of Zoology, University of Michigan, Ann Arbor, MI 48109-1079, U.S.A. (Dr B. O'Connor): 2 females, 1 male and 3 deutonymphs, all paratypes.
